Since one may make an evening visit unasked, on mere acquaintance. The luxuries and ostentation of eating and drinking, which seem the main object of evening society in London, are there subordinate or little thought of. But still this restricted English system of evening society, while it promotes coarse dissipation abroad, keeps the domestic circle but the more pure at home. The wives and daughters of England cannot return improved from a residence in Paris. There are few circles into which a modest Englishwoman, with merely English habits, could advantageously be introduced. The women of France mingle with the men in the conversation of the world on an equal footing-Frenchmen, and Frenchwomen, who talk freely of the intrigues of the opera dancers, and discuss chastity and 'the senses,' like philosophers, without farther transgression. An Englishwoman, laying aside her national reserve, and indulging in a new license, will not know with the Frenchwoman when and where to stop. But we must guard ourselves against being misunderstood. Englishmen in France, deceived by the frank and familiar tone of Frenchand made representations of their general conduct alike vulgar and unfounded. Pictou, 11th July .- Arrived H. M. S. Champion, commander Fair, only two days from the Mag. Island, where she left the Gulnare, (surveying vessel) captain Bay.

All was quiet and well at the Magdalens; ..not a single American fishing vessel there, nor was there the smallest complaint made in intimation of any affray baving taken place between the American fishermen she has cruized along the shores of Nova Scotia, Canada, and the Labrador Coast, visited our fishing establishments at Bay Chaleur, Gaspe, Perie, &c. On the Labrador, from Mount Joli as far westward as the Bay of Seven Islands, visiting the several settlements and establishments along the coast, including those at Mingan St. Johns, and the seven Islands,....she left the latter port on the 30th June, and Natsaguin, near Mount Joli on the 2d inst,.... affording countenance and support to our various settlements along this extensive line of tour, and medical assistance to many who stood much in need of it, in the remote parts which the Champion visited.

The settlers and inhabitants (British subjects), were delighted to see the British flag, and would often talk of the old country-and give vent to warm expressions of love and loyalty.

No American fishing vessels had been seen on the coast of Labrador this year -nor interfered with our fisheries any where along our shores. In the spring they visited the shores of the Magdalen Islands, in the exercise of a right, though women, have sometimes formed notions probably against our interest; nevertheless, as they have, by treaty, the right, we have no cause, no just cause, to complain of

If we are not much deceived, the causes and consequence of this movement will hereafter become topics of serious consideration .- N. Y Com. Advertiser.

The Globe states that the president, to all those who have conversed with him on the subject, has unreservedly declared that in his opinion, · Santa Anna deserves the most ignominious death, and that the only justification for the lenity shown him was to be found in the condition of Texas, which might render it proper to subject the demands of justice to the policy of get-ting rid of the armies of Mexico, through the influence of the chief.' Surely the president never intended or expected that these and such like declarations of his opinion on this subject would be officially promulgated! What will the Mexicans think of this authorized denunciation of their captive president by a 'friendly' nation? For a private citizen to entertain and express the opinion that Santa Anna for his cruelties and barbarities deserved death and ought to be put to death, is not only not improper but very natural. Not so, however, with the president of the United of expression if not of feeling, which is due from one nation to another, no matter what may be thought of the public acts of those at the head of the government, and which ought not to be disregarded or viola: ted. Concord, (New Hampshire) July 18 .-Never did the earth exhibit a greater burden of hay and of all the materials for sustaining our flocks and herds than it does at this time in New England. With an abundance man ought not to complain. If in the new and fertile soil of the West and South, bread stuffs can be produced with less labour we have the advantage of higher prices in what we do produce; & it is questionable whether even the ease with which wheat and cotton are produced in the soil peculiarly adapted to their cultivation, is not more than counterbalanced by our superior advantages in furnishing for other and according to adoption, twice four is people what they are obliged to purchase two.' On suckering corn .- I had the pleasure about five years ago, to spend a day in only, said Pat, company with old Mr. Macon of North know which way I'm going, Carolina, when our conversation was principally on the subjects of agriculture; and among others the cultivation of Indian corn, After having inquired whether I had the suckers which grew from the roots of the corn pulled off, as is the common practice, and received my answer in the affirmative, he informed me that he had suffered them cide. to remain, having from repeated experiments, ascertained that they did not injure the corn, but on the contrary, the suckers, more frequently than otherwise produced good ears of corn; and that if they failed to do so, there was an increase of fodder. I have since tried the experiment, and witnessed the following results: that after carefully examining the ears of corn on the stalks producing suckers, they were found to be as good as the ears on the surrounding stalks not producing them; that a large majority of the suckers produced good corn, though the ears generally were smaller than those on the mother stalk, and that (of course) there was an increase of fodder. Without entering into an inquiry, whether corn ought not to be planted so thick as to prevent its producing suckers [of which] I am not sure] if thick planting will prevent it, or whether the pulling them off may not injure the corn by inflicting wounds on the stalks . I can now safely recommend Mr. Macon's practice, as saving the time and labor of pulling off suckers, and what is of ever, with the president of the United States, as must be seen without argument or illustration.—There is a certain comity add that none but the suckers grawing from the root ought to be suffered to remain .-Far. Trick for Trick .- Jotham Dobbs, engaged at Barnet, Vt. as a schoolmaster, and came recommended by his minister. His agreement with the committee was, that he should receive \$500 a year, and if he gave perfect satisfaction he should receive D200 more. Of course, at the end of the time he did not suit; (why should he have done so, when it would have cost the town 200?) and he was furnished with leave of absence. guished literary talents of the trail lady, and the June, 26. high political rank of the noble defendant, have given to this cause an unusual interest. abridged report of the trial is given in the Liverpool Albion of the 25th June, with the speeches of Sir William Follett, council for the plaintiff; of the Attorney General for defendant, and the summing up of Lord Chief Justice Tindall, before whom, and a special jury of the county of Middlesex, it was tried on the 22d inst. A verdict was returned for the defendant, and on being declared, cries of 'bravo' and hisses arose from different parts of the court, which was crowded to excess-they were not quelled without some trouble on the part of the officers, whose duty it is to preserve order. From a perusal of the evidence given by the Liverpool paper, though we readily admit that it did not permit the jury to come to any other decision than that which they adopted, still enough was shewn to leave a moral conviction on the mind of every one, that an improper intercouse existed between Visconnt Melbourne and Mrs Norton, but the act of adultery was not substantiated by the witnesses. There does not, however, appear on the face of the proceedings, any thing like committance on the part of the husband, or an improper neglect of the society of his wife. He had been appointed to an official situation, that of one of the stipendiary Magistrates of a police office at the cast end of the town, in the year 1831, on his losing some other appointment, and on the personal application of Mrs. Norton to the defendant in the present case. The duties of that office required his attendance from an early hour in the day till six or seven in the evening, and sometimes later; he was consequently necessarily much absent from his residence, which was at the west end of the town and in the intervals of his absence,, count Melbourne was a constant visitor of bis la dy, often remaining for two or three hours with her, and circumstances eame out, on the evidence of servants, certainly enough to cause a husband to entertain strong and just suspicions, but not sufficient to warrant a jury in returning any other verdict than that which was rendered in favour of the defendant. The extent of the acquittal, as it appears, will be best expressed in the Scotch law term, of 'not proven.' The visits of the lady to other noblemen were also proved in evidence, and amongst others, to the bachelor Duke of Devonshire; a line of conduct certainly, not shewing much regard to character, the opinion of the world, or the ordinary conventional rules of society. Still from the abridgement of the report in the paper we quote, we see nothing to justify the cry raised by the Ministerial party of a Tory conspiracy to pull down a Minister by exposing not his political delinquencies, but the profligacy of his private life. The only shadow of a suspi cion which gives rise to the charge, that the Premier used his power to pander to his passion, to be found in the fact that Mrs. Norton, on her husband losing one situation, applied to his Lordship for his appointment to some place of equal value; out of this arose the intimacy, which has led to the consequence exposed upon the tris

Paris, June 30. - Although closely confined in a strait-waistcoat, the prisoner Alibeau made another attempt on his life. One of the two guards who remained with him in his cell having gone out to buy some tobacco, he prevailed on the other soon after to go in quest of his companion, but the door had scarcely been locked on him when rushing with violence against the wall, the prisoner made a desperate effort to put an end to his existence. To obviate the renewal of such an attempt, a well padded cushion has since been fastened on his head, and his feet have been tied together in such a way as to compel him in taking exercise, to move at a more deliberate pace. The opinion which prevails throughout the Province respecting the necessity of increasing the number of our Banks and the amount of our banking capital, may be assertained from the fact that there are no less than eleven notices at ready given in the Official Gazette, of applications for Banks, to the Provincial Parliament at its next ression. its next session.

The fact that, so large an increase of our Banking capital is proposed, shows not only that a large increase is actually necessary, but also that a vast amount of capital can be furnished to supply that increase; for we cannot suppose that the persons who prepose so vait

Some Noble Lords of great weight and influence were desirous that the bill should proceed without witnesses being called to their bar. The royal Duke strongly opposed this course, and in his argument said, 'Another circumstance had great weight with him; namely that an implicit obedience to the House of Commons, much as he respected that House would render the house of Peers useless, and thus the natural and constituent balance in the constitution would be endangered. To the Editor of the Missiskoui Standard.

Sin :- In your last paper you have given what somebody has supposed to be the etymology of the word Canada, the name of this country. Permit me to give you a different meaning of the term from Father Charlevoix.

There is, says the indefatigable historian of New France, an ancient tradition which relates that the Castilians had entered the country as far as the Baye des Chaleurs before the French under the command of Jacques Cartier; and that when they found no mines of silver and gold, the grand objects of their search, they several times pronounced, in the hearing of the savages, the two words, Aca Nada, which in their language, it is said, means, there is nothing here. The poor Indians, thinking that the mysterious words were of wonderful import, repeated them afterwards to Jacques Cartier and his companions, but they, being ignorant of the Spanish language, as I am, or at least, not supposing the words to be Spanish, perhaps on account of the Indian pronunciation, concluded they were only one word, and meant the name of the country. Hence, the name CAFADA. There

In the same place you have also given the etymology of the word Queb.c. It is the same as that given by Father Charlevoix. I wonder the writer did not follow the historian in both cases The word Canada, meaning, the mouth of the country, is nonsense. Any place at which you enter any country, may be called its mouth. Hence, every part of the coast of America, at which people may have entered, might with equal reason be called Canada. But the other derivation is natural. The Spaniards gave it no name. They only grumbled, Aca Nada, there is nothing here, because they found no gold, and the French caught the word from the Indians, under the impression that it was the name of the country.

All the country, now called the Eastern Townships, the State of Vermont, and the State of New York, between Albany & the river St. Lawrence and Lake Ontario, once belonged to the Iroquois Indians, a very powerful nation of Savnges in their day. In this part of their ancient hunting grounds where we reside, I am not aware of the existence of any memorials of the aboriginal inhabitants except only one solitary word, viz. Missiskoui. Charlevoix spells the word 'Mic hiscouy.' In his map it designates the Bay and River of that name. What the meaning or etymology of the word is, he has no where told. Will you, if you can, throw any light on this word? Will you be kind enough to inform your readers whether there really be any memorials of the Iroquois, or any other Indians, yet to be found in any part of the Townships? I am, Sir.

Your humble servant.

Missiskoui County, 11th Aug., 1836. (Senex will find, on page 18 of Thompson's Geography of Canada, a note, in which it is said that Missiskoui ' is derived from the two Indian words Missi much, and Kisko waterfowl. The name Missisko is said to have been given by the natives to the bay and river, on account of the abundance of waterfowl in and about there.' Mr. Thompson thinks that ' Missisco is the preferable way of spelling it, because it is most easily pronounced, is shorter and most conformable to the original. The first two of the above reasons would have but little weight with any philologist; Mr. Thompson might for the same reasons change the spelling of Machillimackinack into Mackinaw, or of Osage into Waw-saskee .- En. FRELIGHSBURG, AUGUST 16, 1836.

There is, perhaps, nothing, which can shew more the vulgar minded malignity of the revolutionists, as the constant reiteration, at all their meetings, of a resolution, to cease using goods of British manufacture. The same resolutions were passed last year by the dozen, throughout the French parishes, so that no one could plead ignorance. If the French population had formerly consumed per capita, an amount of British goods proportionate to that consumed by the population of British, Irish & American origin, or if they had consumed British goods to any great extent, although not proportionate, it is evident, that the putting of those resolutions into effect, must have materially affected the importations of the present season. If, however the consumption of British goods by the French population, did not, in former years take place to any great extent, then is it as evident that their resolutions cannot influence the present year's importations.

The actual value of importations for the present year we do not know, (we should present year). be glad if any of our contemporaries in the cities would apprise us,) but we do know that up to the 28th of last month, the amount of tonnage arrived at the port of Quebec, exceeded that of last year at the same date by some tons. From this we presume that the imports have likewise encreased over those of last year. Some extracts which we found in the Montreal Herald will show to our radical friends the multiplied evils, which the Land Company is bringing on the country. That Land Company must be stopped soon, else it will fill the Townships with loyal settlers, and drive people to the necessity of erecting villages and establishing manufactories. Prospects are miserable. Dollars, to the East of us, are by means of the Company, rendered as plenty as squirrels have been here this summer. What an enormous grievance!! Capital is sent, all the way from England, to raise the prosperity of the Townships. The Company's charter must be abolished, before the Farmers of St. Francis get rich.

AMERICA TO GREAT BRITAIN. BY WASHINGTON ALLSTON.

All hail! thou noble land,
Our fathers' native soil!
O stretch thy mighty hand,
Gigantic grown by toil,
O'er the wast. Atlantic wave to our shore:
For thou, with magic might,
Caust reach to where the light
Of Phoebus travels bright
The world oler. All hail! thou noble land, The world o'er.

The Genius of our clime,
From his pine-embattled steep,
Shall hail the great sublime;
While the Tritons of the deep
With their conchs the kindred league shall proThen let the world combine
O'er the main our naval line,
Like the milky way, shall shine
Bright in fame!

Though ages long have passed
Since our fathers left their home,
Their pilot in the blast,
O'er untravelled seas to roam,

O'er untravelled seas to roam, Yet lives the blood of England in our veins ! And shall we not proclaim That blood of honest fame, Which no tyranny can tame, By its chains?

While the language, free and bold, Which the Bard of Aven sung, Which the Bard of Aven sung,
In which our Milton told
How the vault of heaven rung,
When Satan, blasted, fell with his host;
While this, with reverence meet,
Ten thousand echoes greet,
From rock to rock repeat
Rand our coast; Round our coast;

While the manners, while the arts,
That mould a nation's soul,
Still cling around our hearts,
Between let Ocean roll, Our joint communion breaking with the sun:
Yet, still, from either beach,
The voice of blood shall reach,
More audible than speech,
We are One!

THE MURDER HOLE.

AN ANCIENT LEGEND.

1 see, I' see thee near; I know thy hurried step, thy haggard eye Like thee I start, like thee disorder'd fly

In a remote distance of country belonging to Lord Cassilis, between Ayrshire and Galloway, about three hundred years ago, a moor of apparently boundless extent stretched several miles along the road, and wearied the eye of the traveller by the sameness and desolation of its appearance; not a tree varied the prospect....not a shrub enlivened the eye by its freshness. nor a native flower bloomed to adorn this ants of the cottage. ungenial soil. One 'lonesome desert' reached the horison on every side, with nothing to mark that any mortal had ever the fire, and the looks which the old woman visited the scene before, except a few rude and her sons exchanged, made him wish that were scattered near its centre; that he had preferred the shelter of any one and a road, or rather pathway, for those whom business or necessity obliged to pass in that direction. At length, deserted as this wild region had always been, it became still more gloomy. Strange rumors arose, that the path of unwary travellers had been beset on this 'blasted heath,' and that treachery and murder had intercepted the selitary stranger as he traversed or at least not to incur the danger by reits dreary extent. When several persons, who were known to have passed that way, tired for the night had a confused and desomysteriously disappeared, the inquiries of their relatives led to a strict and anxious investigation; but though the officers of still hung in tatters around it....the table justice were sent to scour the country, seemed to have been broken by some vioand examine the inhabitants, not a trace could be obtained of the persons in question, ous pieces of furniture lay scattered upon nor of any place of concealment which could be a refuge for the lawless or des- might burn in his apartment till he was perate to horde in. Gradually the inhabitants deserted their dwellings on the heath, and settled in dis-self again seated by the fire, where the tant quarters, till at length but one of the cottages continued to be inhabited by an old woman and her two sons, who loudly lamented that poverty chained them to this solitary and mysterious spot. Travellers who frequented this road now generally did so in groups to protect each other; like a cry of distress; he was broad awake and if night overtook them, they usually in a moment, and sat up in bed,-but the stopped at the humble cottage of the old noise was not repeated, and he endeavored woman and her sons, where cleanliness to persuade himself it had only been a concompensated for the want of luxury, and tinuation of the fearful images which had where, over a blazing fire of peat, the disturbed his rest, when, on glancing at bolder spirits smiled at the imaginary the door, he observed underneath it a broad terrors of the road, and the more timid red stream of blood silently stealing its trembled as they listened to the tales of course along the floor. A light now glimmered in the distance that he eagerly bent his way, remembering as he hastened along, that when he had visited it the year before, it was in company with a large party of travellers, who had beguiled the evening with those tales of mystery which had so lately filled his brain with images of terror. He recollected, too, how anxiously the old woman and her sons had endeavored to detain him when the other travellers were departing-and now, therefore, he confidently anticipated a cordial and cheering reception. His first call for admission obtained no visible marks in like a leech !' of attention, but instantly the greatest noise and confusion prevailed within the cottage. They think it is one of the supernatural visitants of whom the old lady talks so much, thought the boy, approaching thewindow, where the light within shewed him all the inhabitants at their several occupations; the old woman was hastily scrubbing the stone floor, and strewing it thickly over with sand, while her two sons seemed with equal haste to be thrusting something large and heavy into an immense chest, which they carefully locked. The boy, in a frolicksome mood, thoughtlessly tapped at the window, when they all instantly startled up with consternation so strongly depicted on their countenances, undefined feeling of apprehension; but before he had time to reflect a moment longer, one of the men suddenly darted out at the door, and seizing the boy roughly by the shoulder, dragged him violently into the cottage. 'I am not what you take me for,' said the boy, attempting to laugh, 'but only the poor pedlar who visited you last year.' 'Are you alone?' inquired the old woman, in a harsh deep tone, which made his heart thrill with apprehension. 'Yes,' said the boy, 'I am alone here; and alas!' he added, with a burst of uncontrollable feeling, 'I am alone in the wide world also! Not a person exists who would assist me in distress, or shed a single tear if I died this very night.' Then you are welcome ! said one of the men with a sneer, while he cast a glance of peculiar expression at the other inhabit-

It was with a shiver of apprehension, rather than of cold, that the boy drew near of the roofless cottages which were scattered near, rather than trust himself among persons of such dubious aspect. Dreadful surmises flitted across his brain; and terrors which he could neither combat nor examine imperceptibly stole into his mind; but alone, and beyond the reach of assistance, he resolved to smother his suspicions, vealing them. The room to which he relate aspect: the curtain seemed to have been violently torn down from the bed, and lent concussion, and the fragments of variings of the door; but they seemed to have been wrenched asunder on some former

It was long ere the pedlar attempted to compose his agitated nerves to rest; but ted new scenes of terror to his mind, with all the vividness of reality. He fancied himself again wandering on the heath, vanished with a hollow and despairing cry. The scene then changed, and he found himcountenances of the men scowled upon him with the most terrifying malignity, and he thought the old woman suddenly seized him by the arms, and pinioned them to his side. Suddenly the boy was startled from these agitated slumbers, by what sounded to him from his bed, and rush to the door, through One gloomy and tempestuous night in a chink of which, his eye nearly dimmed

'I do,' answered the first, gloomily; 'the which would lead him, he conjectured, to Murder Hole is the thing for me...that the cottage of the old woman; and towards tells no tales—a single scuffle—a single plunge and the fellow's dead and buried to your hand in a moment. 'How do you mean to dispatch the lad in the next room?' asked the old woman in an under tone. The elder son made her a sign to be silent, and pointed towards the door where their trembling auditor was concealed; while the other, with an expression of brutal ferocity, passed his bloody

knife across his throat.

The pedlar boy possessed a bold and daring spirit, which was now roused to desperation; but in any open resistance the odds were so completely against him, that flight seemed his best resource. He gently stole to the window, and having by one desperate effort broken the rusty bolt by which the casement nad been fastened, he let himself down without noise or that he shrunk back involuntarily with an difficulty. This betokens good, thought ne pausing an instant in dreadful hesitation what direction to take. This momentary deliberation was fearfully interrupted by the hoarse voice of the men calling aloud, The boy has fled—let loose the blood-hound! These words sunk like a deathhound! knell on his heart, for escape appeared now impossible, and his nerves seemed to melt away like wax in a furnace. Shall I perish without a struggle! thought he, rousing himself to exertion, and, helpless and terrified as a hare pursued by its ruthless hunters, he fled across the heath. Soon the baying of the bloodhound broke the stillness of the night, and the voice of its masters sounded through the moor, as they endeavored to accelerate its speed, panting and breathless the boy pursued his hopeless career, but every moment his pursuers seemed to gain upon his failing steps. The hound was unimpeded by the darkness which was to him so impenetrable, and its noise rung louder and deeper in his earwhile the lanterns which were carried by the men gleamed near and distinct upon

his vision. At his fullest speed, the terrified boy fell with violence over a heap of stones, and having nothing on but his shirt, he was severely cut in every limb. With one wild cry to Heaven for assistance, he continued prestrate on the earth, bleeding, and nearly insensible! The hoarse voices of the men, and the still louder baying of the dog, were now so near, that instant destruction seemed inevitable, malready he felt himself in their fangs, and the bloody knife of the assassin appeared to gleam before his eyes,despair renewed his energy, and once more, in an agony of affright that seemed verging towards madness, he rushed forward so rapidly that terror seemed to have given wings to his feet. A loud cry near the spot he had left arose on his ears without suspending his flight. The hound had stopped at the place where the pedlar's wounds bled so profusely, and deeming the chase now over, it lay down there, and could not be induced to proceed; in vain the men beat it with frantic violence, and tried again to put the hound on the scent,the sight of the blood had satisfied the animal that its work was done, and with dogged resolution it resisted every inducement to pursue the same scent a second time. The pedlar boy in the meantime paused not in his flight till morning dawned-and still as he fled, the noise of steps seemed to pursue him, and the cry of his assassins still sounded in the distance. Ten miles off he reached a village, and spread cord into a tumult of indignation—several of them had lost sons, brothers, or friends on the heath, and all united in proceeding instantly to seize the old woman and her sons, who were nearly torn to pieces by their violence. Three gibbets were immediately raised on the moor, and the wretched culprits confessed before their execution to the destruction of nearly fifty victims in the Murder Hole which they pointed out, and near which they suffered the penalty of their crime. PHILADFLPHIA MIRROR

HE splendid patronage awarded to the Philadelphia Saturday Courier, induces the editors to commence the publication, under the above title, of a quarto edition of their popular ournal, so long known to be the largest Family Newspaper in the United States, with a list of near TWENTY SIX THOUSAND SUBnear TWENTY SIX I HOUSENESS SCRIBERS.—The new feature recent y introduced of furnishing their readers with new books with the best of literature of the day, having proved so eminently successful, the plan will be continued. Six volumes of the celebrated writings of Captain Marryatt, and sixty-five of Mr. Brooks valuable letters from Europe, have already been published without interfering with its news and and miscellaneous reading. The Courier is the largest and cheapest family newspaper ever issued in this country, containing articles in Literature Science and Arts; Internal improvement; Agriculture; in short ever variety of topics usually introduced into a public journal. Giving full accounts of sales, markets, and news of the lates,

It is published at the low price of 2 dollars For this small sum subscribers get valuable and entertaining matter, each week enough to fill a common book of 200 pages, and equal to 52 volumes a year, and which is estimated to be read, weekly, by at least two hundred thousand people, scattered in all parts of the country, from Malue to Florida, and from the sea board to the Lakes. The paper has been so long established as to render it too well known to require an extended prospectus, the publishers, will do no more than refer to the the two leading daily political papers of opposite politics. The Pennsylvanian says... The Saturday Courier is the largest, and one of the best family newspapers in the Union; the other, the enquirer and Daily Courier, says, it is the largest journal published in Philadelphis, and one of the very best in the United States The New York Star says we know of nothing more liberal on the part of the Editors, and no means more efficacious to draw out the dormand talents of our country, than their unexampled lib erality in offering literary prizes.

erality in offering literary prizes.

The Albany Mercury of March 30th, 1836, says, 'the Saturday Courier, is decidedly the best Family Newspaper ever published in this or any other country, and its value is duly appreciated by the public, if we may judge from its vast circulation, which exceeds 25,000 per week! Its contents are agreeably varied, and each number contains more really valuable 'reading matter than is published in a week in any daily paper in the Union.—Its mammoth dimensions enable is enterprising proprietors, Messrs. Woodward & Clarke of Philadelphia, to re publish in its columns, in the course of the year, several of the most interesting new works that issue from the British press, which cannot fail to give to its permanent interest, and render it worthy of preservation. To meet the wishes, therefore of such of their subscaibers as desire to have their numbers bound, they have determined on issuing an ediction of the Centre in the Onarto form, which bound, they have determined on issuing an edition of the Ceurier in the Quarto form, which will render it much more convenient for reading when it is bound in a volume, and thus greatly enhance its value.'
